SCIENTISTPRESS.COM

What is expert and project category?

Note: Here it is important note that expert category and project category both are different.

Expert category are the your subject of expertise, on which you done study or most of your work. On that subject you can accept a new challenge also.

Project category is related to that one project only. like one expert who done PhD in chemistry but may learned/ worked on 1-2 projects of biology, biotechnology, Analytical, pharmaceuticals etc during his professional journey. So he can advice on that 1-2 project of other subjects, but in chemistry he have deep understanding so he may able to accept a new project also.

We use expert category when a request for a new project (eg. of chemistry category) come by a clients for that no registered expert of that project available . Than we will contact the all expert of that category (chemistry) if they are able to take that new project. So it will help you get new unique projects.

Hence one expert can upload number of projects of different category.

Like the same way is client category and service category.

After login Expert dashboard

expertise topic/
projects on which you
can do consultancy.

List of all inquiries by
others related to your
topics

Submit your feedback
/ testimonials here

Like wise After login Client dashboard will be open for clients, it is almost similar only difference is clients has to create new service request which they want

What is a project or service request?

Project meaning a topic/ title of a theoretical or experimental skill /activity, on which you have worked and have expert knowledge of it, on that you can provide consultancy or solution of any query related to it.

Project` can be simple or complex, can be a single step or multistep, project can be theoretical or experimental activity.

Project may be a theoretical topic; like design of a machine part / building map and with its dimensions, calculation of raw material consumption required. Writing of a research proposal for grant approval, theoretically report preparation for regulatory purpose, Patent search report and its analysis etc.

Project may be a experimental topic of single step or multi step activity; like multistep synthesis of a drug/ impurity, analytical method development, cultivation of medicinal plants, extraction methods, medicinal or cosmetic formulation development (tab, cap, syrup, shampoo etc.) Biotechnology culture identification and cultivation, different techniques of tissue culture, hybridization, bio fertilizer production and so many.

For a big company multi step activities may be considered in a single project. But here in scientistpress.com each single activity can be consider a different project. Like developing medicine for a disease, is a complex and multi step project. It can be divided in small multistep projects, biologically: - identification of in vitro in vivo testing methods, chemistry:- synthesis of drug molecules, Analytically:- Analysis method development and impurities identification. Toxicological study:, Clinical study etc.

In final conclusion a big project need to be divided in multiple small projects of single steps and complete step by step for a successful completion of big project.

So each small and big activity is a project and is important to complete a big project.

Upload project (Your expertise topic/ projects)

****This is the most important part of your dashboard.****

You are searchable only by your “project topic“ so after registration you must upload at least one your expertise skill topic/project upload, other wise you will not appear in any search result.

This is to protected your privacy and security

If you don't have complete description of your expertise/project ready, in such case upload at least your expertise topic and later on update this.

No one can search by name, category etc.

2. Give a tile to your topic

UPLOAD PROJECT

Home / Upload Project

1. Select category related to your topic

PROJECT CA

--Select Cate

PROJECT TITLE

Project Title *

ABSTRACT *

3. Enter brief abstract of your topic/project.

USES/APPLICATION

4. Enter its uses/ application

Upload project (Your expertise topic/ projects)

Second part of expertise topic/ project is also important.
Why a client select you for contact as compare to other expert of same topic?

4. Enter your plus points as compare to other experts of same topic

ADVANTAGES

5. Enter your shortfalls if any as compare to other experts of same topic

DRAW BACKS

6. If you want to upload more details, your publication, images, charts related to topic etc. (in word, .pdf file)

UPLOAD FILE

(Maximum Size 5MB)

Choose File No file chosen

[Download Blank Format](#)

I have read and agree to the [scientistpress.com Copyright Policy](#)

Submit

7. Read and agree, you must have ownership of what you upload.

What After submit my project?

1. After submit the project you will get a confirmation email
2. Your project details will go to reviewer to check, whether it is relevant to science; Is it have any industrial uses for society etc.
3. If require, reviewer may ask to correct/edit details.
4. Once reviewer approved it, after that only it will be open for all to see.
5. Once it open to all, any person can search your topic and if they satisfy with your expertise can contact you through website.

Clients have two options

1. First search in the existing experts, if you got someone than contact him.
2. Second if no existing expert found than submit the new service request which you are looking and it will go same review process (like project upload in expert)
3. It will send to all related category experts, without your identification details if any one can help you.
